

Assembly instructions

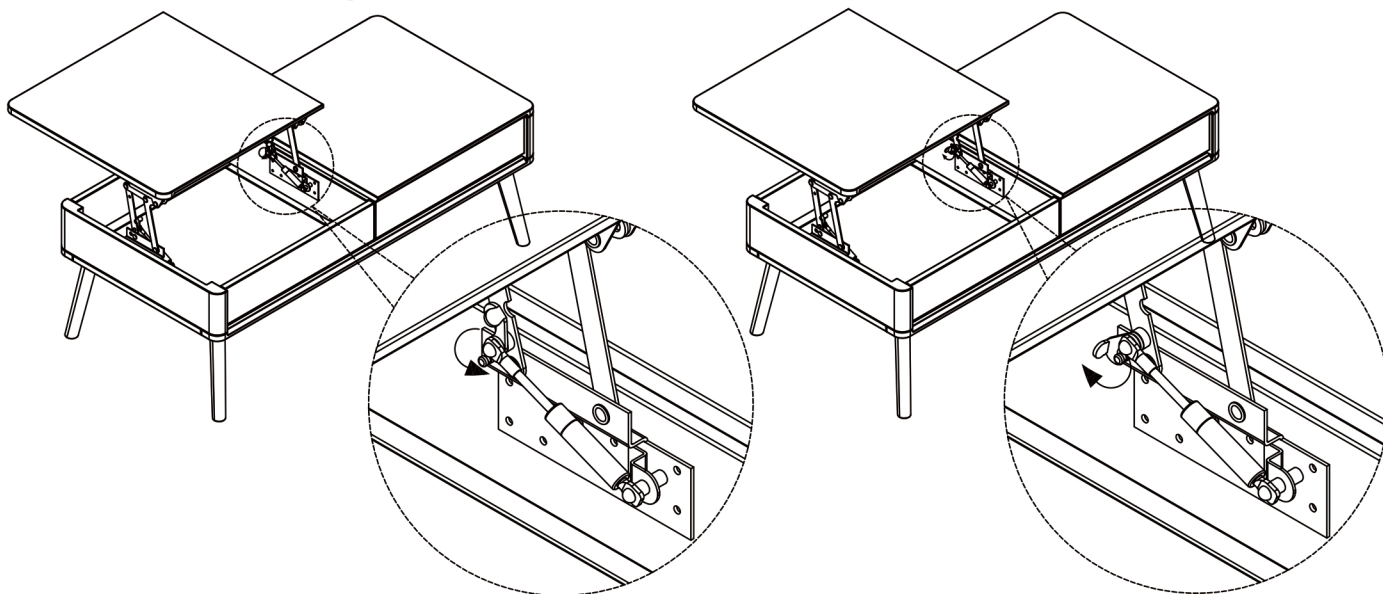

The assembly procedure is as follows:

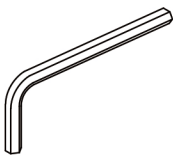

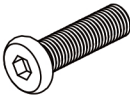

With the coffee table upside down or on its side, assemble the four foot posts.

Once the panel is up, press and hold the lockout switch on the center portion of the lift to snap the switch onto the small post that protrudes below and serves to prevent the panel from sinking.

When you need to lower the panel, flip the lockout switch on the center portion of the lift so that the switch is clear of the small post protruding from underneath, then slowly lower the panel.

	
A. Allen wrench = 1	B. Hexagonal screws M8×15=12
